Introduction

About Techverge Africa

Techverge Africa Ltd is a Ghanaian technology company based in Kumasi. We build software for schools, businesses and public institutions, designed to work with mobile money, SMS and USSD as well as the web. Our first product is SchoolOS, a school management platform.

About this guide

This guide explains how to use the Techverge name, logo, colours and typefaces, and how to write about the company. Use it when you design the website, prepare documents and presentations, post on social media or brief a designer or printer. If something is not covered, ask the brand contact listed opposite.

Item	Detail
Company name	Techverge Africa Ltd
Short name	Techverge
Incorporated	30 July 2026, Kumasi, Ghana
Logo	The V mark (see page 4)
Main colours	Blue, green and orange from the logo
Typefaces	Sora for headings, DM Sans for text
Brand contact	[Name, email]

Always write the name as **Techverge Africa Ltd** in legal and formal documents, as on the certificate of incorporation, and **Techverge** elsewhere. Do not write "Techverge African".

Logo

The logo is a V formed by a blue stroke and a green stroke, joined at the base by an orange section. Use the master files only. Do not redraw or rebuild it.

Clear space. Leave space equal to x around the logo, where x is the height of the orange section.

Minimum size

Screen: 24 px high. Print: 10 mm high.

Logo with company name

Until a final wordmark is designed, set "Techverge" in Sora Bold and "Africa" in Sora Regular next to the logo. A designer should produce the final version.

Logo: backgrounds and incorrect use

Approved backgrounds

Light grey

White

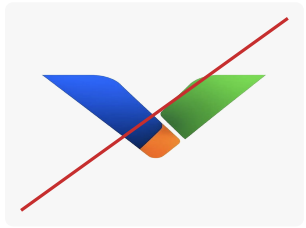

Navy

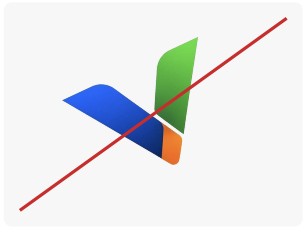

Logo files needed

The current logo is a JPG on a grey background. Ask a designer for a vector SVG, transparent PNG files at 512 and 1024 px, a white version for dark backgrounds, and favicons at 32 and 180 px.

Do not

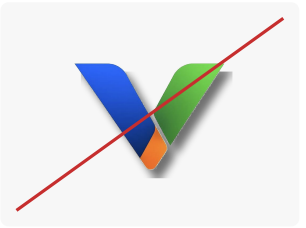

Stretch or squash

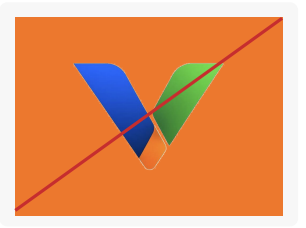

Rotate

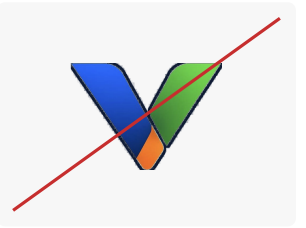

Change the colours

Add a shadow

Place on brand colours

Add an outline

Colour palette

The colours are taken from the logo. Use the HEX values for screen and the token names in code. Confirm print colours with your printer from a proof.

Main colours

Blue
#2D66F5 RGB 45, 102, 245
brand-blue

Green
#5BAA42 RGB 91, 170, 66
brand-green

Orange
#EC782E RGB 236, 120, 46
brand-orange

Navy
#14357F RGB 20, 53, 127
brand-navy

Supporting colours

Button blue
#2252CD RGB 34, 82, 205
action-primary

Midnight
#0F2A66 RGB 15, 42, 102
brand-midnight

Light green
#78D853 RGB 120, 216, 83
brand-green-bright

Dark green
#3D7839 RGB 61, 120, 57
brand-green-deep

Neutrals

Light grey
#F7F7F7 RGB 247, 247, 247
surface-0

White
#FFFFFF RGB 255, 255, 255
surface-1

Pale grey
#EEF1F6 RGB 238, 241, 246
surface-2

Border
#D5DAE3 RGB 213, 218, 227
line

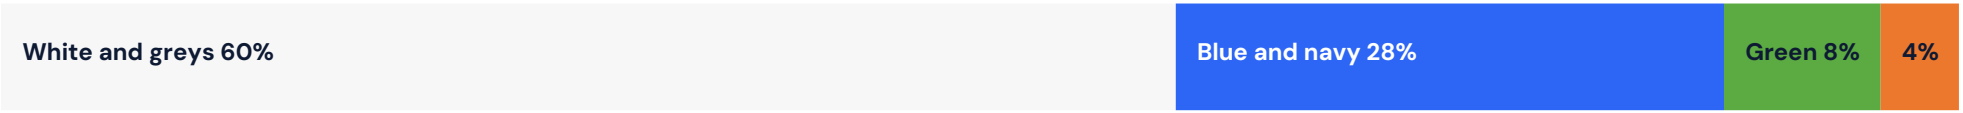

Grey text
#4A5875 RGB 74, 88, 117
ink-muted

Text
#0E1A33 RGB 14, 26, 51
ink

Using colour

Most of each layout should be white or light grey. Use blue as the main colour, green as the second colour and orange only in small amounts.

Approximate proportions

Orange is for a single highlight, such as a badge or one key figure. If a page looks busy, remove orange first.

Text and background combinations

Aa **White on button blue**
Contrast 6.7:1. Buttons and links.

Aa **Text colour on orange**
Contrast 6.0:1. Badges, highlights.

Aa **White on blue**
Contrast 4.9:1. Large headings only.

Aa **White on green**
Contrast 2.9:1. Do not use.

Aa **White on navy**
Contrast 11.4:1. Dark sections, footer.

Aa **Text colour on light green**
Contrast 9.7:1. Highlights on navy.

Aa **White on orange**
Contrast 2.9:1. Do not use.

Body text needs a contrast of at least 4.5:1 (WCAG AA). When colour shows a status, also write the status in words, for example "Paid" or "Overdue".

Typography

Sora is used for headings and DM Sans for text. Both are free from Google Fonts. If they are not available, for example in Word or PowerPoint, use Arial.

Sora

Headings and titles

Regular	ABCDEFGHIJKLM abcdefghijklm 0123456789
SemiBold	**ABCDEFGHIJKLM abcdefghijklm 0123456789**
Bold	**ABCDEFGHIJKLM abcdefghijklm 0123456789**

DM Sans

Body text, labels, buttons

Regular	ABCDEFGHIJKLM abcdefghijklm 0123456789
Medium	ABCDEFGHIJKLM abcdefghijklm 0123456789
Bold	**ABCDEFGHIJKLM abcdefghijklm 0123456789**

Sizes for the website

64 px **Page headline**

44 px **Heading 1**

32 px **Heading 2**

22 px **Heading 3**

16 px Body text

14 px Small text

Use sentence case for headings. On phones, reduce the page headline to 40 px and Heading 1 to 32 px. Keep lines of body text to about 65 characters. In printed documents, use 10.5 pt for body text.

Layout, icons and photography

Layout

- Use a 12-column grid with a maximum width of 1200 px on the website.
- Leave generous space: 96 px above and below each website section on desktop, 64 px on phones.
- Keep at least 16 px margin on each side on phones.
- Corners are slightly rounded: 6 px for inputs, 10 px for buttons, 16 px for cards.
- Use thin borders to separate content; use shadows only for menus and pop-ups.

Icons

- Use simple outline icons with a consistent line weight, such as the free Lucide set.
- Show icons in the text colour or grey text colour. Blue may mark the selected item.
- Put a text label next to each icon, except common ones such as close, menu and search.
- Do not use emoji on the website or in products.

Photography

- Use real photos of people, schools, offices and markets in Ghana, in natural light.
- Show people using phones and computers in real settings.
- Avoid stock photos of handshakes, robots or glowing screens.
- Get written permission before photographing children, and avoid showing their faces in marketing.
- Label screens that use sample data as examples.

Writing style

Write clearly and simply, as you would explain the product to a head teacher or business owner in person.

- Start with what the reader gets, then explain how it works.
- Use short sentences and paragraphs. Many readers are on phones.
- Only use figures you can prove. Do not claim to be the best or the leading company.
- Use "we" for Techverge and "you" for the reader.
- Use local terms people know: MoMo, cedis (GHS), SHS, exeat.
- Buttons and links say what happens: "Book a demo", "Send message".

Write	Avoid
Parents can pay school fees with MoMo and receive an SMS receipt.	Seamless, innovative payment solutions for the modern school.
SchoolOS is used by [number] schools in Ashanti.	Ghana's number one school platform.
Results are sent to parents within 3 days of approval.	Results in record time!
Book a demo	Click here

Website structure

The website should help schools, businesses and public institutions understand what Techverge does and make it easy to get in touch.

Page	Content	Main button
Home	Who we are, our products, why work with us	Book a demo
Products	Overview, with a page for each product	View SchoolOS
SchoolOS	Features, pricing, questions	Book a SchoolOS demo
Solutions	Custom software for schools, businesses and government	Contact us
About	Company story, team, company details	Contact us
News	Updates, articles, case studies	Read more
Careers	Vacancies and internships (link in footer)	View vacancies
Contact	Form, phone, WhatsApp, email, address	Send message

Main menu: Products, Solutions, About, News, Contact, and a "Book a demo" button. Keep the header fixed at the top of the screen.

Website: home page

Suggested sections, from top to bottom. Replace all bracketed text with real information before publishing.

- Header
- Main banner
- Key facts
- Products
- How we work
- Why Techverge
- Customer quote
- Contact banner
- Footer

Main banner

Heading: "Software for schools and businesses, built in Ghana." Text: "We build web, mobile money, SMS and USSD tools that work on the phones people already use." Buttons: "Book a demo" and "View our products". A screenshot of SchoolOS.

Key facts

Two or three true facts, for example the number of schools using SchoolOS and "Based in Kumasi".

Products

One card for each product: name, one sentence, two or three features and a link.

How we work

Three steps: we study your needs, we build and set up the system, we train your staff and support you.

Why Techverge

Made for Ghana (MoMo, SMS, local school calendar). Works on basic phones. Protects personal data under the Data Protection Act, 2012 (Act 843).

Customer quote

Add only when you have a real quote with the customer's permission.

Contact banner and footer

Navy banner with "Book a demo". Footer with menu links, phone, email, address and "© 2026 Techverge Africa Ltd".

Website: other pages

SchoolOS page

- Heading, short description, demo button and screenshot
- The problems it solves: fee collection, late results, paper exeat records
- Features with screenshots
- Mobile money, SMS and USSD
- Pricing per student per term
- Common questions: data protection, set-up time, training

About and Contact

- About: how the company started, what we do, team photos with names and roles
- Company details: Techverge Africa Ltd, incorporated in Ghana on 30 July 2026, Kumasi
- Put registration numbers on invoices and contracts, not on the website
- Contact: a short form, phone, WhatsApp, email, address and opening hours
- State how quickly you reply, for example "within one working day"

Technical requirements

- Design for phones first and test on a mid-range Android phone
- Keep the home page under 1.5 MB; compress images (WebP)
- Give every page a unique title and description
- Check text contrast, keyboard focus, image descriptions and form labels
- Publish a privacy policy before collecting any personal data
- Track demo requests and contact form messages
- Make a favicon from the logo (32 and 180 px)

Stationery and social media

Business card (85 × 55 mm)

[Full name]
[Job title]

[Phone]
[Email]
[Website]
Kumasi, Ghana

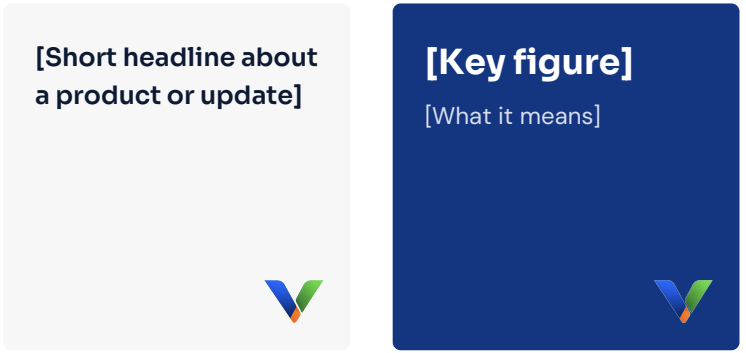

Front: logo on navy. Back: white with name, job title and contact details. Print on 350 gsm matt card.

Email signature

[Full name]
[Job title], Techverge Africa Ltd
[Phone] | [Email] | [Website]

Text only. Do not add quotes, banners or large images.

Social media

- Profile picture: the logo on white, centred, with clear space.
- Cover image: navy background with the logo and company name.
- Posts: light or navy backgrounds, one short headline, the logo in a corner.
- Use at most three hashtags.

Documents, products and next steps

Letters and documents

- Logo with company name at the top left; address, phone and email at the top right
- Footer: "Techverge Africa Ltd, incorporated in Ghana" and the registration number
- Body text in DM Sans or Arial, 10.5 pt, with 25 mm margins
- Presentations: 16:9, navy title slides and white content slides, headings that state the main point

Product names

- Each product has its own name, followed by "by Techverge Africa", for example "SchoolOS by Techverge Africa"
- Products use the same colours and typefaces as the company
- Buttons always use button blue
- Name files clearly, for example techverge-logo-colour-1024.png

Next steps

- Ask a designer for the logo files and a final wordmark
- Name a person responsible for the brand
- Update the website using this guide
- Order business cards and set up email signatures
- Update social media profiles
- Review this guide after six months
